A student will only get a score if they've completed 85% of the test. If the student is a participant but doesn't get a score they count as a NULL in proficiency.

	ELA	Science	Math	What does this mean for my school?
First Year of Enrollment in U.S.*	✓	✓	✓	Counts for Participation only
Second Year of Enrollment in U.S.	✓	✓	✓	Counts for Growth Only
Third Year of Enrollment in U.S.	✓	✓	✓	Counts for Achievement & Growth

\* If the test has been started and 6 or more questions have been answered, the test is considered participating and we just leave it as is. (No code necessary.)

\* If the student has responded to 85% or more of the items, then the test will be scored and a proficiency level determined based on the 85%+ that was completed.

\* If 6 or more items were responded to, but less than 85%, the test will count as participating, but no score will be given.

\* If less than 6 items were responded to, we would invalidate the test and mark the special code that best fits the reason they did not test.
