

SAVE MONEY ON YOUR OUT-OF-POCKET EXPENSES

DID YOU KNOW some surgeries can be done outside of a hospital in an Ambulatory Surgical Center. When you use one of these specialized facilities you save significant dollars on your out of pocket expenses.

By using **Coral Desert Surgery Center** or **St George Surgical Center** you pay 0% coinsurance after your deductible is met for the facility charges.

You pay 10% Coinsurance after your deductible is met on procedures done at any other Ambulatory Surgery Center

WHY USE AN AMBULATORY SURGERY CENTER

- Each Ambulatory Surgery Center specializes in certain surgeries, and is more likely to have special equipment and experienced staff.
- Thanks to new technology, more procedures—like knee replacements, for example—can now be done in Ambulatory Surgery Centers

IF YOU ARE GOING TO HAVE ONE OF THESE PROCEDURES, ASK YOUR DOCTOR IF AN AMBULATORY SURGERY CENTER IS RIGHT FOR YOU

CATEGORY OF SURGERY	COMMON PROCEDURES IN THAT CATEGORY
Ear, nose & throat	Tonsil removal, ear tubes
Stomach and colon issues	Colonoscopy, endoscopy, hemorrhoid removal
General	Biopsies, hernia repair, appendix removal, gall bladder removal
Gynecology	Hysteroscopy, hysterectomy, tubal ligation
Eye surgeries	Cataract removal, repair of retina, cornea transplant
Plastic surgery	Skin grafts
Foot issues	Bunion removal, hammer toe repair
Prostate, bladder and kidney issues	Some prostate surgeries, bladder exam by scope, kidney stone surgery
